Table Summary

This table shows the percentile for each column along with MCT.

In 25th percentile across SSLC, HSC, UG and entrance test, the marks are with in 60.5 where there is slight dip of 2% in MBA mark which is 58.

In 50th percentile (which is the Median) across SSLC, HSC, UG- the marks are with in 65.5 where there is slight dip of 3% in MBA mark which is 62 and in entrance test, could see a rise up-to 6% which is 71.

From Q1 to Q2 percentile, there is a rise in the marks range up-to 7%.

In 75th percentile across SSLC, HSC, UG - the marks are with in 73.5 where there is a dip of 11% in MBA mark which is 62 and in entrance test, could see a rise up-to 10% which is 83.5.

From Q2 to Q3 percentile, there is a rise in the marks range up-to 7% in SSLC,HSC,UG and MBA. Where in entrance test the range goes up-to 12% rise.

In 100th percentile across SSLC and UG - the marks are with in 91, HSC and in entrance test, could see a rise up-to 8% which is 98. where there is a fall of 13% in MBA mark which is 78.

From Q3 to Q4 percentile, there is a rise in the marks range up-to 14% in

SSLC,HSC,UG and entrance. Where in MBA the rise is up-to 11% only.

From 99th to 100th percentile, there is a rise in the marks range up-to 2% in SSLC, 6% in HSC, 8% in UG and in MBA & entrance there is only 1% high.

Table Summary

This table shows IQR and Outlier range along with the percentile, MCT for each column.

Lets discuss about Outliers for each column:

SSLC_P:

For SSLC_P, we have arrived with Lesser range as 37.95 and there is no value less than 37.95. Hence we are concluding that there is no Lesser Outlier in SSLC_P.

Also as we have Greater outlier range as 98.35 and there is no value greater than 98.35. Hence we are concluding that there is no Greater Outlier in SSLC_P.

No Outliers in SSLC_P.

HSC_P:

For HSC_P, we have arrived with Lesser range as 42.75 and there is no value less than 42.75. Hence we are concluding that there is no Lesser Outlier in HSC_P.

Also as we have Greater outlier range as 91.15 and there are values greater than 91.15. We are concluding that there are Greater Outliers residing after 91.15 to 97.7 in HSC_P.

No Lesser Outliers but there are Greater Outliers in HSC_P.

Degree_p:

For Degree_p, we have arrived with Lesser range as 44.5 and there is no value less than 44.5. Hence we are concluding that there is no Lesser Outlier in Degree_p.

Also as we have Greater outlier range as 88.5 and there are values greater than 88.5. We are concluding that there are Greater Outliers residing after 88.5 to 91.0 in Degree_p.

No Lesser Outliers but there are Greater Outliers in Degree_p.

Etest_p:

For etest_p, we have arrived with Lesser range as 24.75 and there is no value less than 24.75. Hence we are concluding that there is no Lesser Outlier in etest_p.

Also as we have Greater outlier range as 118.75 and there is no value greater than 118.75. Hence we are concluding that there is no Greater

Outlier in etest_p.

No Outliers in etest_p.

MBA_p:

For MBA_p, we have arrived with Lesser range as 45.48 and there is no value less than 45.48. Hence we are concluding that there is no Lesser Outlier in MBA_p.

Also as we have Greater outlier range as 78.72 and there is no value greater than 78.72. Hence we are concluding that there is no Greater Outlier in MBA_p.

No Outliers in MBA_p.

Salary:

For Salary, we have arrived with Lesser range as 150000 and there is no value less than 150000. Hence we are concluding that there is no Lesser Outlier in Salary.

Also as we have Greater outlier range as 390000 and there are values greater than 390000. We are concluding that there are Greater Outliers residing after 390000 to 940000 in Salary.

No Lesser Outliers but there are Great Outliers in Salary.
